

SELF BUILD SUPPORT

If you're planning to build your own aircraft, or maybe you've bought a fabulous kit and aren't sure how to progress, we can help.

Our on-site LAA inspectors can provide supervision and assistance at all build stages, and Richard Kilham is authorised to provide final inspection and sign-off for each build-assisted stage.

We can assist with, or complete, mandatory and build modifications.

We offer support full services for all composite, metal or wood and fabric LAA Permit aircraft from initial assembly to paintwork schemes, refurbishment and Permit renewal.
